

Best-in-Class Capital Projects

ABT uses Bechtel's world-class design tools and work processes, allowing for real time collaboration between ABT and Bechtel's offices around the globe. ABT will therefore maintain its core competencies in key engineering, procurement and construction disciplines with additional support from the Bechtel worldwide network to provide specialized expertise on an as-needed basis.

In this way, cost effective EPC services will be provided to customers in the Caribbean while ensuring that cost, schedule and quality commitments for capital projects are met.

Why
ABT

Uncompromising Commitment to Safety

Zealous dedication to safety in design, construction and operation is the hallmark of ABT. Both partners (Bechtel & ARE) have demonstrated a commitment to safety with their Risk Management programs and performance on diverse projects. Further, Bechtel has been a global leader in the area of safety with its Zero Accident Philosophy and Behavior Based Safety programs.

High Performance Team Execution

Teamwork and innovation are requirements for achieving success in this competitive global economy. ABT has the backing of ARE, with its champion team based approach to plant operations, based on strong behavioral competencies. This strong human resource focus supports the company's vision and allows ABT to meet its objective of finding the optimal EPC solutions for its clients.
